SUSTAINABILITY

Food Donation Program

Leftover material (food and booth supplies) from Expo West is donated to local non-profits, including Habitat for Humanity and Second Harvest Food Bank. Second Harvest Food Bank works to provide food to all who need it with a concentrated focus on our most vulnerable populations– children, working families, college students and seniors.

After Expo West 2022, we were able to donate a total of 208,573 lbs. of food through the generous help of over 350 local volunteers! Broken down that amount included 130,249 lbs. of dry food, 53,403 lbs. of cold/refrigerated food, and 24,921 lbs. of frozen food products generously donated by our exhibitors last year.

Zero Plastic Initiative and Our Partnership with r.Cup

Natural Products Expo is working towards the elimination of single use plastics to better align with our show mission. We recognize the impact the trade shows have on our planet, and as we take steps to do better, we ask that our attendees and exhibitors walk alongside us! We encourage our community to join us by bringing their reusable water bottle and coffee mug to the show, asking for recycling bags in your hotel room if one is not provided, and choosing digital avenues vs. the standard printed pieces when it comes to picking up and distributing booth literature.

In an effort to reduce single use plastic, we are partnering with r.Cup to bring reusable cups to various Expo West events! The continued reuse of these cups allows us to avoid tons of single-use, disposable waste.

Here's how it works: Natural Products Expo rents r.Cups, which are made of durable, sustainable material. r.Cup will drop off clean, sanitized cups to the Expo West community or networking event, you get to enjoy your beverage in a high quality cup, and then you drop them into the return bins around the event. r.Cup then picks up the used cups and sanitizes them at their local wash hub so that they can continue to be reused! With this system, r.Cup is keeping tens of thousands of single-use cups from entering the waste stream—at every single event.
